

AFEEZ LAWAL (DAZEEFA)

Full-Stack Developer (React / Node.js) | UI/UX Designer

hire@dazeefa.com | +234-708-281-6283 | portfolio.dazeefa.com | Lagos, Nigeria

Profile

Full-stack developer and UI/UX designer with 3+ years of hands-on experience designing and building responsive, production-ready websites and web applications. Skilled across the full stack, from Figma prototypes and pixel-perfect UI design to React frontends, Node.js/PHP APIs, and Supabase/PostgreSQL/MySQL databases. Track record of delivering across fintech, e-commerce, community, and coaching sectors, consistently praised for design quality, performance, and post-launch reliability. Available immediately for remote full-time and contract opportunities globally.

Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Tailwind CSS, Framer Motion, Responsive Design

Backend: Node.js, PHP, REST APIs, Firebase Auth, Supabase

Database: MySQL, PostgreSQL, Supabase

Payments: Stripe, Paystack

Testing & Quality: Manual and functional testing, input validation, code reviews, cross-browser and cross-device QA

Tools: Git, GitHub, Vercel, SEO Principles, Claude, GitHub Copilot (AI-assisted development)

Design: Figma, Adobe Photoshop, Illustrator, After Effects, UI/UX, CMS (WordPress)

Selected Projects

Sturdy Life - E-commerce Platform

Developer | Client Project | sturdyliifer.com | 2026

[E-commerce | Payment Integration | Full Build]

- Built a full-stack e-commerce platform for a menswear brand, covering product catalog, cart, checkout, and order management.
- Integrated Paystack for secure payment processing across the customer purchase flow.
- Developed the frontend with React and Framer Motion for smooth, polished interactions, styled with Tailwind CSS.
- Built the Node.js backend with a MySQL database to handle products, orders, and transactions.

Stack: React, Node.js, Tailwind CSS, Framer Motion, MySQL, Paystack

ScanMyFrame - QR-Powered Physical Frame Platform

Designer and Developer | Personal SaaS Product | scanmyframe.com | 2026 - Present

[SaaS Product | QR Integration | Subscription Tiers | Paystack]

- Conceived, designed, and built a SaaS platform that bridges physical and digital experiences: customers scan a QR code on a physical frame to unlock interactive digital content.
- Architected REST API endpoints, PostgreSQL schema, and Supabase storage and auth layers, implementing input validation and secure authentication flows throughout.
- Built subscription tier system with Paystack integration, including plan management, billing logic, and payment webhook handling.
- Managed full product lifecycle: branding, Figma UI/UX design, full-stack development, and production deployment.

Stack: React, TypeScript, Node.js, Tailwind CSS, Supabase, PostgreSQL, Paystack

Bossador - Subscriber Community Platform

Designer and Developer | Client Project | bossador.com | 2026 - Present

[Subscription System | Stripe Integration | Auth System]

- Designed and developed a subscription-gated community platform live in production, featuring role-based access control and member management.
- Integrated Stripe for recurring payments, covering subscription lifecycle, webhook events, and billing edge cases end to end.
- Implemented Firebase Auth for secure user authentication and session management across the platform.
- Built the complete frontend from a Figma design system using React, Tailwind CSS, and Framer Motion.

Stack: React, TypeScript, Tailwind CSS, Framer Motion, PHP, MySQL, Firebase Auth, Stripe

Ignite2Transform - Coaching and Alignment Website

Designer and Developer | Client Project | ignite2transform.com | 2026

[UI Quality | Smooth Animations | Full Build]

- Hired to replace an existing design the client was dissatisfied with; delivered a fully responsive, production-ready site the client described as beautiful and attractive.
- Resolved cross-device responsiveness issues from the previous build; site performs consistently across all screen sizes and browsers.
- Built PHP backend for form handling and data submission with input validation and secure endpoint design.

Stack: Figma, React, TypeScript, Tailwind CSS, Framer Motion, PHP

Mumbossador - Women Community Platform

Designer and Developer | Client Project | mumbossador.com | 2025

[Community Platform | Smooth Animations | Full Build]

- Designed the full UI in Figma and built the production site with React, Tailwind CSS, and Framer Motion, delivering a smooth animated experience across mobile and desktop.
- Engineered PHP and MySQL backend data layer including user data management and content workflows.
- Delivered within the agreed timeline; client satisfaction resulted in an unsolicited bonus payment and public endorsement of the work.

Stack: Figma, React, Tailwind CSS, Framer Motion, PHP, MySQL

Jfortmedia - Entertainment Blog

Developer | Client Project | jfortmedia.com | 2025

[WordPress | Custom Theme | Performance]

- Built a fast-loading WordPress site with a customized theme aligned to the brand's visual identity; praised by client for fast delivery and post-launch support.
- Optimized page load performance through CSS best practices and asset management.

Stack: HTML, CSS, JavaScript, WordPress (custom theme)

Energy DJOPDot - DJ Personal Website

Designer and Developer | Client Project | energydjopdot.com | 2025

[WordPress | Custom Theme | SEO]

- Designed and built a premium personal website with blog integration and on-page SEO optimization that improved organic search visibility.
- Client praised the premium look, fast load speed, and improved Google visibility post-launch.

Stack: HTML, CSS, JavaScript, WordPress (custom theme + blog)

Work Experience

Freelance Web Designer & Developer

Self-employed | Remote | 2023 - Present

- Delivered production websites and web applications for clients across e-commerce, coaching, entertainment, and community sectors, managing full project lifecycles from discovery and Figma design through development, deployment, and post-launch support.
- Collaborate directly with clients and stakeholders to scope requirements, then handle development, bug fixes, and iterative improvements post-launch.
- Consistently receive unsolicited positive feedback from clients on design quality, site speed, mobile responsiveness, and post-launch support.
- Developed JavaScript and React features that improved user interaction and project efficiency by up to 20%.
- Use AI-assisted development tools (Claude, GitHub Copilot) to accelerate delivery while maintaining clean, reviewable code and participating in collaborative code reviews.

Web Design & Development - Intensive Training

Capstone Projects | Udemy Bootcamps | 2023 - 2024

- Completed full-stack web development and UI/UX design bootcamps; built multiple capstone projects using HTML, CSS, JavaScript, and WordPress.
- Achieved 10% improvement in page load times through CSS optimization and implemented SEO strategies that improved organic search visibility.
- Maintained all projects using Git for version control throughout the program.

Education

B.Sc. Mass Communication

National Open University of Nigeria | Lagos | 2019 - 2024

Training and Certifications

2023 | Complete Web Design: From Figma to Webflow | Udemy

2023 | Web Development Bootcamp (HTML, CSS, JS, Node.js, React.js) | Udemy
