

AFEEZ LAWAL (DAZEEFA)

Web Designer & Frontend / Full-Stack Developer

hire@dazeefa.com · +234-708-281-6283 · portfolio.dazeefa.com · Lagos, Nigeria

PROFILE

Web designer and full stack developer with 3+ years of hands-on experience designing and building responsive, production ready websites and web applications. Skilled across the full stack, from Figma prototypes and pixel perfect UI design to React frontends, Node.js APIs, Supabase, and MySQL/PostgreSQL databases.

I focus on building products that are not only functional and scalable, but also visually engaging and user centered. Clients have described my work as beautiful, fast, and reliable because I care deeply about both the user experience and the quality of the code behind it.

Currently building ScanMyFrame, a platform connecting digital storytelling to physical frames through QR technology.

Available for remote full-time and contract opportunities globally.

SKILLS

Design	Figma · Adobe Photoshop · Illustrator · After Effects · UI/UX · Responsive Design
Frontend	React.js · Next.js · JavaScript (ES6+) · HTML5 · Tailwind CSS · Framer Motion
Backend	Node.js · PHP · REST APIs · Firebase Auth · Supabase
Database	MySQL · PostgreSQL · Supabase
Payments	Stripe, Paystack
CMS	WordPress (custom themes & plugins)
Tools	Git · GitHub · Vercel · SEO Principles

SELECTED PROJECTS

ScanMyFrame - QR-Powered Physical Frame Platform

2026 – Present

Designer & Developer · Personal SaaS Product · scanmyframe.com

[SaaS Product - QR Integration - Subscription Tiers - Paystack]

- Conceived, designed, and built a SaaS platform that bridges physical and digital experiences — customers scan a QR code on a physical frame to unlock interactive digital content linked to that frame.
- Handled the full product lifecycle: branding, UI/UX design in Figma, full-stack development, subscription tier architecture, and Paystack payment integration.
- Stack: Figma, React, Next.js, Tailwind CSS, Supabase, PostgreSQL, Paystack

Bossador - Subscriber Community (Live)

2026 – Present

Designer & Developer · Client project · bossador.com

[Subscription System - Stripe Integration - Auth System]

- Designed and developed a subscription-gated community platform, 80% complete and already live in production.
- Integrated Stripe for payments, Firebase Auth for user authentication, and built the full UI from a Figma design system.
- Stack: Figma, React, Tailwind CSS, Framer Motion, PHP, MySQL, Firebase Auth, Stripe

Ignite2Transform - Coaching & Alignment Website

2026

Designer & Developer · Client project · ignite2transform.com

[UI Quality - Smooth Animations - Full Build]

- Hired to replace a design the client disliked; delivered a visually striking, fully responsive site that the client described as 'beautiful and attractive'.
- Built responsive layouts that perform flawlessly across all screen sizes, a specific pain point with the previous design.
- Stack: Figma, React, Tailwind CSS, Framer Motion, PHP

Mumbossador - Women Community Platform

2025

Designer & Developer · Client project · mumbossador.com

[UI Quality - Smooth Animations - Full Build]

- Designed the full UI in Figma and built the production site using React, Tailwind CSS, and Framer Motion, delivering a smooth, animated experience optimised for mobile and desktop.
- Built backend data layer using PHP and MySQL; client was so satisfied she paid a bonus on top of the agreed fee and publicly praised the work.
- Stack: Figma, React, Tailwind CSS, Framer Motion, PHP, MySQL

Jfortmedia - Entertainment Blog

2025

Developer · Client project · jfortmedia.com

[UI Quality - Wordpress Custom - Full Build]

- Built a fast-loading WordPress site with a customised theme matching the brand's visual identity; praised by the client for fast delivery and post-launch availability.
- Stack: HTML, CSS, JavaScript, WordPress (custom theme)

Energy DJOPDot - DJ Personal Website

2025

Designer & Developer · Client project · energydjopdot.com

[UI Quality - Wordpress Custom - Full Build]

- Designed and built a premium personal website with blog integration; client praised the premium look, fast load speed, and improved Google visibility.
- Stack: HTML, CSS, JavaScript, WordPress (custom theme + blog)

WORK EXPERIENCE

Freelance Web Designer & Developer

2023 – Present

Self-employed · Remote

- Delivered 5+ production websites for clients across coaching, entertainment, and community sectors handling full project lifecycle from discovery and Figma design to development and launch.
- Consistently receive unsolicited positive feedback from clients on design quality, site speed, mobile responsiveness, and post-launch support.
- Developed JavaScript and React features that improved user interaction and project efficiency by up to 20%.
- Maintained clean, reviewable code and participated in collaborative code reviews on team projects.

Web Design & Development - Intensive Training

2023 – 2024

Capstone Projects · Udemy Bootcamps

- Completed full-stack web development and UI/UX design bootcamps; built multiple capstone projects using HTML, CSS, JavaScript, and WordPress.

- Achieved 10% improvement in page load times through CSS optimisation and implemented SEO strategies that improved organic search visibility.
- Maintained all projects using Git for version control.

EDUCATION

B.Sc. Mass Communication

2019 – 2024

National Open University of Nigeria · Lagos
